FULWOOD'S
Frost-Proof
CABBAGE
PLANTS

Ready September
1st to June 1st

EARLY JERSEY WAKEFIELD

Many market gardeners consider this the very best Cabbage grown. Its merits are many, among which are medium heads, for an early variety, small outside foliage, and uniformity of crop. Heads are white, solid and tender. This variety always brings a good price because of its earliness and it is therefore a good money-maker.

CHARLESTON WAKEFIELD

This Cabbage is much like the Jersey Wakefield. It has a much larger head, however, and is about ten days later. This is a desirable variety for shipping purposes as the heads are solid and firm. It is a strong favorite with growers for a main crop.

COPENHAGEN MARKET

A fine Cabbage. This variety is nearly as early as the Jersey Wakefield. The stem is short, has large round and solid head with few outer leaves, of an upright growth. My stock of this popular variety is extra early, uniform and dependable.

GOLDEN ACRE

Golden Acre is very similar to Copenhagen Market, being a few days earlier. The plants usually produce marketable heads in 65 to 70 days, which is as early as the Early Jersey Wakefield. It is a round headed variety for market gardeners and shippers.

I am buying cabbage seed from Ferry-Morse Seed Co., paying twice as much as other growers pay for their seed. I do this to give you the very best plants that will be uniform in size, head up true to name. In fact, this is the very finest seed that can be used, and you could not take chances on planting any plants except those you know would give you perfect satisfaction.

FULWOOD'S GENUINE *Frost-Proof* PLANTS

Ready Sept. 1 to June 1
Wilt-Resistant Varieties

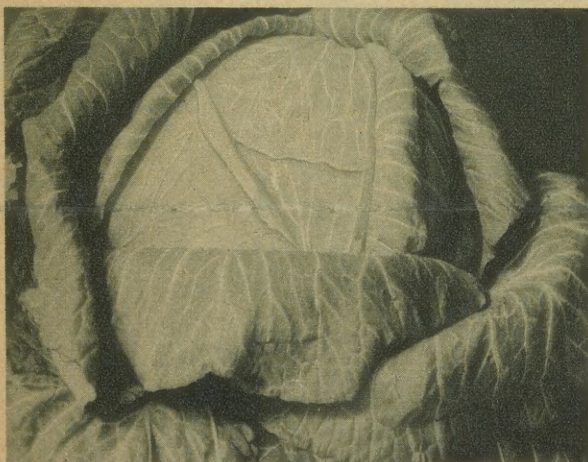

YELLOW RESISTANT MARION MARKET

This is also offered as Wisconsin Copenhagen and is a very important mid-season yellows-resistant sort of Cabbage for kraut manufacture and market. This variety has prominent globular heads which approach those of Glory of Enkhuizen in size, and it produces a heavy yield on yellows-infested soil where ordinary varieties fail.

YELLOW RESISTANT WISCONSIN ALL SEASON

This is a yellows-resistant strain developed at the Wisconsin Experiment Station by selection of healthy plants out of standard All-Seasons grown on infested land. Wisconsin All-Season is a very valuable, heavily productive, hard-headed variety of particular merit for use in yellows-infested localities and it is well adapted for kraut and for winter use.

EARLY FLAT DUTCH

One of the oldest varieties. The head is usually large and flat, tender and fine grained. My strain of this Cabbage is of the best to be had. It is excellent for a tonnage crop because of the large heads.

GEORGIA BLUE STEM COLLARD PLANTS

These plants are very much like the Cabbage plants. They grow from two to three feet tall, with light green, tender leaves on long stems. They withstand heat and have an excellent flavor when cooked. I have a good supply on hand the year round and can make prompt shipments at the same price as Cabbage.

Money saving postpaid plant collections will be found on next to the last page in this catalog.

FULWOOD'S GENUINE *Frost-Proof* ONION PLANTS

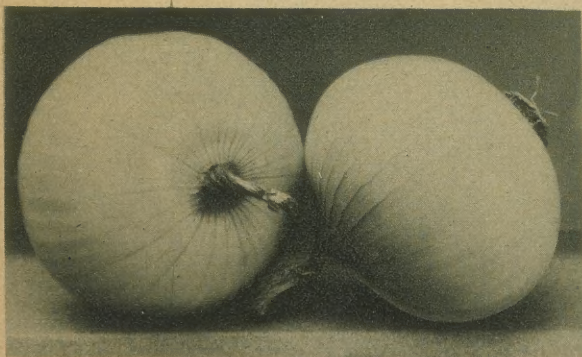

LIKE all Genuine Fulwood Vegetable Plants, my Onion plants are grown, packed and shipped with the utmost care and precision. Plants are grown from the finest seed I can obtain. All seed is treated before planting and plants are sprayed during the growing period and thus you are assured of good, healthy, strong plants. Because they are grown in the open field and are subject to light frosts during the growing period, they are Genuine Frost-Proof plants and will stand temperatures as low as 18 to 20 degrees above zero without injury. Onions grown from Fulwood's Genuine Frost-Proof Onion plants are also an excellent

money crop, as they can be marketed at least two weeks in advance of Onions grown from sets and way ahead of Onions grown from seed. Furthermore, my plants will make much better Onions than those grown from sets, the Onions being larger and they do not run to seed. They will also keep much better when cured and stored.

My Onion plants should be set out the same time as my Cabbage plants, and you can order them for shipment at the same time. My Onion plants are not to be confused with cheap Texas plants kept on storage. Order my fresh pulled plants for a bumper crop on Onions.

Varieties

YELLOW BERMUDA

This is the most widely grown of all Bermuda Onions. No sweeter Onion is grown than this, and it always has a ready market and is a large producer and a real money-maker. Whether grown for marketing or for your own table use, you can make no mistake in ordering this variety.

CRYSTAL WAX BERMUDA

Probably the best selling Bermuda Onion on the market because of its exceptionally attractive appearance. It has the same general appearance as the Yellow Bermuda except that it is crystal white and waxy. Because of its sweet, mild flavor, like the Yellow Bermuda, this is an excellent eating Onion.

SPANISH VALENCIA

Sweet Spanish Valencia onion seed crop was a total failure and I will have no plants of this variety. In fact, it will be impossible to buy Valencia onion plants anywhere in 1942. I have secured seed of the Yellow Bermuda and Crystal Wax varieties at heavy cost and can make prompt shipments of these two varieties at any time.

FULWOOD'S Tomato PLANTS

Acres of tomato plants ready for shipping

Ready April 1st to June 15th

SHIP more Tomato plants than any other grower, shipping them by millions to practically every state in the Union, to both large and small canning factories, truck farmers, gardeners, and to individuals who grow tomatoes for their own use. I have developed these varieties to a very high state and my plants are exceptionally rooted, large and stocky. They are all open field grown and are acclimated to outside temperatures and will start growing quickly and produce rich, red ripe Tomatoes much earlier and more surely than home-grown plants. Tomato plants are not frost-proof, however, and should not be ordered shipped until all danger of killing frost is passed. My Tomato plants are not perishable and when packed as I pack them, in deep, damp moss, they will keep in good condition for several days.

In growing my Tomato plants I use the very finest Certified seed I can buy and plant only on new land. The plants are sprayed continuously to prevent disease, and when ready for shipment, plants are pulled one at a time and the roots are well wrapped in damp moss. These Tomato plants can be shipped successfully to all parts of the United States.

DESCRIPTION OF VARIETIES OF TOMATO PLANTS

GREATER BALTIMORE is similar to the Stone, heavily productive and very valuable for canning. Fruits are scarlet-red, large, commonly weigh six ounces; deep but flat; smooth, very firm and solid.

MARGLOBE is a splendid type for earliness and uniformity; particularly valuable for shipping; definite disease-resistance recommends this type for use in sections infested with Fusarium Wilt and Nail-head Rust. Plants thrifty and heavily productive, of long bearing period. Fruits uniform deep scarlet; large; uniformly globe shaped; smooth, solid and of distinct quality.

BONNIE BEST is unexcelled as a general purpose Tomato; very valuable as a canning and shipping variety in northern sections. Fruits evenly colored bright deep scarlet-red; medium large; flattened globe shape; smooth and firm.

PRITCHARD (SCARLET TOPPER) is a very promising, heavily productive wilt-resistant variety for home and market garden, shipping and canning. Fruit large, globe shaped, scarlet and well colored about the stem end; flesh firm and of fine quality.

RUTGERS is highly recommended as a second early maturing variety for canning and Tomato juice. Fruits are of medium to large size, similar in shape to Marglobe, but slightly more flattened.

10,000 plants and over..	2.00 Per 1,000

Southerners who know their Yams will appreciate this Porto Rico as the finest ever. People in the East and Middle West who know Sweet Potatoes only as being small, dry and yellow have a real treat in store for them if they will try this luscious variety. My Porto Rico always has a deep rich red meat that is especially sweet and tasty. It is two to three weeks earlier than most yams and is an enormous yielder and keeps especially well. Northern markets and curing houses pay top prices for this variety.

FULWOOD'S EGGPLANT PLANTS

FULWOOD'S GENUINE FROST-PROOF CABBAGE PLANTS

● Vegetables sold early in the season bring many times the price of those marketed several weeks later, Fulwood's Genuine Frost-Proof plants produce from two to three weeks before home-grown plants—and that's why they are real money-makers for the buyer.

● Here at Tifton, Georgia, where my plantation is located, the soil and climatic conditions are ideally suited for growing tough, hardy, healthy plants in the open field during the winter and early spring. The plants make a slow but steady growth and when eight or ten weeks old they are extremely tough and hardy. In this condition they can be shipped to territory farther north and be planted in the open fields there a month or six weeks earlier than home-grown, hot-bed, or cold frame plants.

● These Frost-Proof plants will stand temperatures of 18 to 20 degrees above zero without injury. Freezing of the soil or covering of the plants with ice, sleet or snow after they have been planted will not injure them unless the temperature gets below 18 to 20 degrees.

● Because my plants are so strong and healthy, and because they can safely be planted considerably in advance of home-grown plants, is the reason for their being able to make large, extra early crop—all ready for market during the time prices are high. Many unreliable growers are selling plants and calling them "Frost-Proof." In many instances these growers are located where they do not have frosts during the growing period and, therefore, the plants they are offering have never been subjected to the frosts.

PLANTING CHART

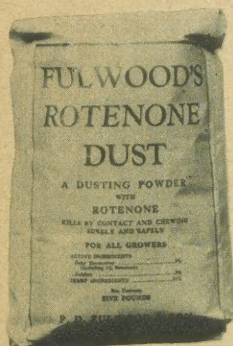

Fulwood's Vegetable Plants	Fulwood's Special Selected Varieties	Hardiness as to cold	Width of row in feet	Distance apart in drill in inches	Plants to set 100 to 150 ft. of row	Plants to set one acre

Pepper	California Wonder	Frost Kills	3'	24"	50	15,000

PLANTING NOTES: When plants arrive, if your ground is not in condition to plant right away, take the plants out of the crate, cut the bands, spread them out and place the roots in soft mud. In planting, pack soil well around the roots, pouring water in the hole after the plants are set out. Throw loose dirt around the plants after watering to keep the wet soil from drying out. Use chart above for proper spacing.

INSECT CONTROL NOW MADE EASY BY NEW METHOD . . .

FULWOOD'S NEW ROTENONE DUST

Kills by contact and stomach poisoning. (Not harmful to man.)

Fulwood's New 1% Rotenone Dusting Powder is effective for the following pests: Cabbage Worm, Diamond Black Looper, Leaf Tyer, Cabbage Lice, Mexican Bean Beetle, Colorado Potato Beetle, Tomato Bug,, Asparagus Beetle, Tomato Horn Worm, Bean Leaf Hopper, Flea Beetle, Thrips, Celery Leaf Tier, Gay Rose Bug, Web Worms, Plant Lice.

FULWOOD'S NEW ROTENONE DUST should be applied in dry weather, the plants, however, must not necessarily be dry, as its effectiveness is not lost on wet plants. The maximum kill is obtained in one to three days, according to weather conditions.

A good hand or power duster of the usual type is satisfactory for use.

For best results plants should be dusted as soon as pests appear and repeat (until controlled) as needed. It is advantageous to dust at regular intervals about every seven days. Proper application and as complete coverage as possible helps in securing successful control of the pests being treated. Both lower and upper sides of the plant growth should be thoroughly dusted. The kind and age of the plants being treated will determine the amount of dust required. The quantity will vary from 15 to 25 pounds per acre.

We guarantee the composition is accurately stated in the analysis on this package. There is no guaranty or warranty either expressed or implied as to results to be obtained from the use of these goods. Climate and soil conditions and other factors beyond the Seller's control necessarily affect results. The Buyer agrees that the Seller shall not be responsible or liable for injuries to crop, soil, person or property arising out of the use or handling of this material whether in accordance with directions or not.

Price, delivered, \$1.40.

TESTIMONIAL LETTERS

Received the onion, cabbage and lettuce plants. They certainly are fine. I think every one I set is growing. I am very well pleased with them.—Louise Finch, Springfield, Mo.

I sure had wonderful luck last year. I picked as high as 240 bushels of tomatoes per picking, and had tomatoes from July to October, from 10,000 tomato plants.—A. F. Sealey, Vermillion, South Dakota.

Tomato plants arrived okeh. They were very fine. I am highly pleased with them. Will recommend your firm highly.—J. A. Yost, Meadville, Pa.

I received my plants yesterday and am real pleased with them. They are just as you described them to be, and my plant orders from now on shall be Fulwood orders.—Mrs. Warren L. Fouty, Hiwassee, Va.

Just 4½ days from ordering, the plants had reached Madison, Wis. I call that service.—J. L. Chandler, Madison, Wisconsin.

We were well pleased with the plants we got from you last year. Will gladly recommend your plants to anyone.—Mrs. Elliott Doty, Lerna, Ill.

Last year I joined the Chilton Country Tomato Association. Instead of ordering my plants through the association as the others did at a very high price, I ordered direct from Fulwood. My plants came at a good time. Nearly all my plants lived. I soon saw that I had an extra good acre of tomatoes. The county agent sent a man to look them over. He said that he believed that I had the best acre in Chilton County.

From this acre I sold three hundred fifty (350) baskets, averaging twenty-two (22) pounds to the basket, for which I received \$358.70.—J. W. Hand, Mt. Creek, Alabama.

PLAY SAFE WITH FULWOOD'S

Guarantee

I guarantee all of my plants to be exactly as described in this catalog. Fresh pulled day order is received (where weather will permit). Plants pulled one at the time, counted and packed to carry to your home in good condition. Any plants arriving in bad condition will be reshipped at once, provided you notify me within five days. When you purchase Fulwood's plants you will receive full count, no runts, no diseased plants, and you will receive the exact varieties ordered.

I send you only the highest quality plants and gladly stand back of them. However, weather, soil, and care also influence crops, so in no case shall I be responsible for any amount beyond the purchase price.
